**B.Tech in
CS-Artificial Intelligence,
Block chain and
Business System**

School of Computer Science & Technology
Faculty of Engineering & Technology

B.Tech. - Computer Science- B.Tech.- AI, BC & Business Systems

Program Details

Faculty	Engineering and Technology (FET)
School	School of Computer Science and Technology (SCST)
Department	Computer Science- B.Tech.- AI, BC & Business Systems
Program	B.Tech., Computer Science- B.Tech.- AI, BC & Business Systems
Dean of Faculty	
Director of School	Dr. Sanjay Pande M.B.
Head of Department	Dr. Shankarayya Shastri

1.	Title of the Award	B.Tech. in Computer Science- B.Tech.- AI, BC & Business Systems
2.	Modes of Study	Full Time
3.	Awarding Institution /Body	GM University
4.	Joint Award	Not Applicable
5.	Teaching Institution	Faculty of Engineering and Technology, GM University
6.	Date of Program Specifications	March -2025
7.	Date of Course Approval by the Academic Council of GMU	---
8.	Next Review Date:	---
9.	Program Approving Regulating Body and Date of Approval	---
10.	Program Accredited Body and Date of Accreditation	---
11.	Grade Awarded by the Accreditation Body	---
12.	Program Accreditation Validity	---
13.	Program Benchmark	N/A

14.	<p>The Bachelor's program in Computer Science and B.Tech.- AI, BC & Business Systems (B.Tech. Computer Science and B.Tech.- AI, BC & Business Systems) offers a comprehensive and innovative education for students aspiring to excel in the dynamic field of computer science, software engineering, and the strategic integration of technology into business operations. This program is meticulously designed to provide students with a robust foundation in both theoretical principles and practical applications of computer science, fostering a deep understanding of creative problem-solving, software design, and advanced technologies in the computer science and B.Tech.- AI, BC & Business Systems industry.</p> <p>Over the course of four years, students engage in a well-structured curriculum that seamlessly integrates core engineering principles with specialized courses in computer science and B.Tech.- AI, BC & Business Systems. The program adopts a hands-on approach, incorporating software projects, system design, and internships to enable students to apply theoretical knowledge to real-world challenges in computer science and B.Tech.- AI, BC & Business Systems.</p> <p>Key areas of study include programming principles, algorithms, data structures, artificial intelligence, machine learning, software development methodologies, computer networks, and the strategic implementation of technology in business environments. Students gain proficiency in using cutting-edge programming languages, development tools, and simulation software, preparing them for the challenges of the contemporary computer science and B.Tech.- AI, BC & Business Systems industry.</p> <p>The B.Tech. Computer Science and B.Tech.- AI, BC & Business Systems program aim to equip graduates for diverse career opportunities across various sectors, with a particular focus on leveraging technology to enhance business processes. Potential career paths encompass roles in technology companies, business enterprises, consulting firms, research and development, and entrepreneurship within the computer science and B.Tech.- AI, BC & Business Systems domain.</p> <p>The interdisciplinary nature of computer science and B.Tech.- AI, BC & Business Systems opens avenues to explore diverse applications, enabling graduates to contribute to advancements in technology, software solutions, and the development of efficient B.Tech.- AI, BC & Business Systems. Continuous learning and staying abreast of the latest industry trends are crucial for graduates to thrive in the rapidly evolving field of computer science and B.Tech.- AI, BC & Business Systems. The program spans eight semesters, providing a holistic education that prepares students for a successful and impactful career in the dynamic realm of computer science and B.Tech.- AI, BC & Business Systems innovation.</p>

15.	<p>Program Educational Objectives (PEOs)</p> <p>PEO-1: Knowledge and Technical Skills</p> <p>The Bachelor's program in Computer Science and B.Tech.- AI, BC & Business Systems aims to provide graduates with a robust foundation in computer science and engineering principles, encompassing algorithms, data structures, artificial intelligence, and machine learning. Upon completion, graduates will possess the knowledge and technical skills necessary to analyze, design, implement, and optimize software systems and intelligent solutions. They will be well-equipped to address real-world challenges, particularly in the strategic integration of technology into business processes, fostering efficiency and innovation.</p> <p>PEO-2: Professional Competence and Leadership</p> <p>To instill technical competencies, practical skills, and leadership abilities in graduates, preparing them for success in the dynamic field of computer science and B.Tech.- AI, BC & Business Systems. Graduates will excel in roles within technology companies, business enterprises, consulting firms, research and development, and entrepreneurial ventures within the computer science and B.Tech.- AI, BC & Business Systems domain. They will be capable of assuming both technical and leadership positions, contributing to advancements in technology and innovation, with a specific focus on leveraging technology for strategic business success.</p> <p>PEO-3: Holistic Development and Adaptability</p> <p>The program aims to nurture critical thinking, creativity, innovation, collaboration, effective communication, information literacy, flexibility, adaptability, leadership, responsibility, and social and cross-cultural interaction skills. Graduates will demonstrate the ability to adapt to evolving professional environments, ensuring they contribute effectively to the dynamic and challenging field of computer science and B.Tech.- AI, BC & Business Systems. The interdisciplinary nature of the program prepares graduates for diverse career trajectories, fostering holistic development and lifelong learning.</p> <p>The overarching goal of the B.Tech. In Computer Science and B.Tech.- AI, BC & Business Systems is to produce graduates who are well-prepared to meet the challenges of the dynamic computer science and B.Tech.- AI, BC & Business Systems industry, contribute to technological advancements, and make a positive impact on strategic business processes and society.</p>
16.	<p>Program Outcomes (POs) (Graduate Attributes)</p> <p>PO-1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.</p> <p>PO-2: Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles</p>

of mathematics, natural sciences, and engineering sciences.

PO-3: Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO-4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO-5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO-6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO-7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO-8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO-9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO-10: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO-11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO-12: Lifelong learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

17.

Program Specific Outcomes (PSOs):

PSO-1: Analyze and Address B.Tech.- AI, BC & Business Systems Challenges

Graduates will demonstrate the ability to analyze complex computational requirements specific to B.Tech.- AI, BC & Business Systems, identify challenges, and articulate problems with necessary specifications. Leveraging their understanding of computer science principles within the B.Tech.- AI, BC & Business Systems context, graduates will deliver innovative solutions, addressing issues related to software development, algorithm design, and computational applications in the B.Tech.- AI, BC & Business

Systems domain.

PSO-2: Apply B.Tech.- AI, BC & Business Systems Concepts in System Development

Graduates will be equipped to envision, model, design, implement, and test software systems and computational solutions in the context of B.Tech.- AI, BC & Business Systems. They will demonstrate proficiency in addressing technical challenges within the field of computer science and B.Tech.- AI, BC & Business Systems, utilizing their knowledge of algorithms, data structures, and software development methodologies to create efficient, reliable, and innovative applications tailored to business needs.

PSO-3: Conduct and Lead Experimental Validation in B.Tech.- AI, BC & Business Systems

After completing the program, graduates will showcase the capability to strategize, coordinate, and execute experiments for the validation and verification of B.Tech.- AI, BC & Business Systems and solutions. They will adeptly use laboratory techniques and software tools for designing and simulating computational processes, emphasizing the importance of addressing challenges specific to B.Tech.- AI, BC & Business Systems. Graduates will be prepared to assume leadership roles in research projects, effectively managing teams and resources in the context of computer science and B.Tech.- AI, BC & Business Systems.

These Program Specific Outcomes are tailored to ensure that graduates are not only well-versed in the theoretical aspects of computer science and engineering but also possess the practical skills and leadership qualities required to make meaningful contributions in the specialized field of computer science and B.Tech.- AI, BC & Business Systems. The outcomes emphasize the application of computer science principles in addressing real-world challenges and the development of innovative solutions in the realm of B.Tech.- AI, BC & Business Systems.

18. Definition of Credit:

1 Hr. Lecture (L) per week	1 Credit
2 Hr. Tutorial (T) per week	1 Credit
2 Hr. Practical (P) per week	1 Credit

Sl.No.	Program -Category	Credits
1.	Program-Core courses, elective Courses, open electives	130
2.	Technical Competency	10 (SDTCD)
3.	Life Skills	3(CASP)
4.	Innovation and Entrepreneurial Skills	3(CIPI)
5.	Environmental Awareness and Community Services	3(SA)
6.	Athletics, Sports, Yoga, Gymnasium	3(SA)
7.	Cultural & Literary Activities	3(SA)
8.	Co-Curricular Activities (Seminar/Conference/Exhibition/Technical Competition)	2(SA&SP)
9.	Placement Training	3(CASP)
